

DOWNLOAD NEW PATCH AND IMPORT INVOICE FORMAT

You should download new patch for better results. If you are worried about new problem coming due to new patch, please be assured that any such new problem generated due to new patch will be attended within 7 working days by providing new patch for download. To download new patch:

Please download latest patch for unisolve (If 16.2 is already loaded) from:

ftp://ftp.bhiwal.com/ GST UNISOLVE CROSS/PATCH/LAST_PATCH.ZIP

*Unzip above file in the folder of US.EXE (It can be seen by right click on icon, properties and open file location option) You may need to change target exe to US.exe if the icon is not pointing to US.exe,.

*In case of LAN(Multiple computers, repeat above step on all computers)

We do understand that all this contains a lot of technical jargon but GST regime has forced us to deliver updates online only and we are working on improving and simplifying this process. Thank you for your cooperation!

After downloading current patch 16.2.16, you have menu option to download new patch and it can be copied on LAN computers as well automatically.

You can mport the format using

System->System Maintenance->Import Format

While Printing

You will have to **change format name while printing** in invoice using Alt-P. First you will have to delete the existing format name displayed there, then this imported format name will have to select above imported file name for printing using this new format. You can set page size for any format by selecting page length in printing window. 24 is 4 inches (One third of page), 36 is 6 inches (Half page), 72 is 12 inches (Full page). Page Width should be 79 for 80 column printers and 132 for 132 column printers.

In Print options window, select: Use Dot Matrix Printer efficiently option. Select Printer Name if it is not to be printed on default printer. Keep port name blank.

To set tear off on dot matrix printer, use hardware settings of printer or set zero tear option.

For half page printing on laser printer, cut the stationery into half pages and put in paper tray accordingly.

To import attached format for dot matrix printer SWILWDQ9.TXT

To import attached format for laser printer SWILWLQ3.TXT

For additional formats:

To import invoice format for wholesale/distribution in Unisolve

ftp://ftp.bhiwal.com/_GST_UNISOLVE_CROSS/Formats/formatsUS.zip

In this directory individual files are also available for download. There is a PNG file associated with each format file which displays how to import the format into Unisolve using System->Import/Export->Import Format (Win).

ftp://ftp.bhiwal.com/_GST_UNISOLVE_CROSS/Formats/

SWILDD19.TXT

To use format for Packing Slip/Challan

SWILPD.TXT For Dot Matrix Printer

SWILPL.TXT For Laser Printer

SWILPW.TXT For Common (Dot Matrix and Laser Printer)

Download above file name and same name PNG file (for instructions) or unzip from above zip file. You can import the format using System->System Maintenance->Import Format (Win) option : -

***Format File Naming convention**

1st Character to 4th Character SWIL represents company designed default format.

5th Character is D or W or R or P (Distribution/Wholesale/Retail (Cross)/PackingSlip)

6th Character is D or L or W (Dot Matrix/Laser/Common for wh. & dist. & dotmatrix & laser (W))

7th Character is Q (if not numeric) for formats having option to print Free Qty as Qty. Disc.

Select Format Type In import Format window based on above 6th Character:

Format Type **Dos** for Dot Matrix (D)/ **Windows** for Laser or Common (L/W)

Select: Import Dos Format as Dos Format for Dot Matrix (D)

7th Character & 8th & 9th Character is used to number the formats as there are multiple options.

Dot Matrix Formats imported as Dos Formats give a bit better speed as character printing happens whereas on laser printer, image printing happens. It is possible to customize these formats and print logo on laser printer formats. All customization in formats files is chargeable.

We shall improve this guide as time permits. Thank you

SWIL Team
