HOW TO DOWNLOAD NEW PATCH for UNISOLVE/CROSS

You should download new patch for better results. If you are worried about new problem coming due to new patch, please be assured that any such new problem generated due to new patch will be attended within 7 working days by providing new patch for download. To download new patch:

Please download latest patch for Unisolve/Cross (If 16.2 is already loaded) from:

ftp://ftp.bhiwal.com/_GST_UNISOLVE_CROSS/PATCH/LAST_PATCH.ZIP

For Unisolve

*Unzip above file in the folder of US.EXE (It can be seen by right click on icon, properties and open file location option) You may need to change target exe to US.exe if the icon is not pointing to US.exe,.

For Cross

*Unzip above file in the folder of CS.EXE (It can be seen by right click on icon, properties and open file location option) You may need to change target exe to CS.exe if the icon is not pointing to CS.exe,.

Common steps

*In case of LAN (Multiple computers, repeat above step on all computers)

After downloading any patch 16.2.16 or later, you have menu option to download new patch and it can be copied on LAN computers as well automatically.

You have menu option to download SWILUPDATE.dll which will contain new option when we don't deliver patch. It can be copied only on server computer and used. If you copy on lan nodes, you will be able to see new options on node as well.

You have menu option to download UPC.zip and use the same for finding out HSN/ tax codes. It contains around 2 lac products. It is a free service provided by AWACS and we do not take any responsibility for accuracy of the same.

We do understand that all this contains a lot of technical jargon but GST regime has forced us to deliver updates online only and we are working on improving and simplifying this process. Thank you for your cooperation!

We shall improve this guide as time permits. Thank you

SWIL Team
